

Hyundai Auto Canada

At Hyundai Auto Canada, diversity, equity and inclusion (DEI) comprise the foundation of our organizational culture. The emphasis on DEI at Hyundai Canada contributes directly to all five of our core values: operating with a customer-focus; embracing challenge; cooperation to fuel collaboration; a culture that develops and respects our people; and lastly, enforcing globality - honouring the diversity of all cultures and customs.

We are dedicated to creating a workplace that reflects the diversity of our Canadian communities and consequently, that of our customer base. We believe differences should be celebrated and are regarded as an opportunity to learn about one another. We recognize that each person's unique experience contributes to our culture, innovation and overall success. The Hyundai Canada workplace respects different experiences, ideas and beliefs, and is a place where everyone feels empowered to bring their full, authentic selves to work.

Furthermore, Hyundai Canada administers methods to identify and remove barriers which may impede inclusion and equal opportunity. Through our inclusive policies, as well as ongoing training and recruitment practices, we are committed to ensure a welcoming, bias-free culture for everyone.
